Inspector Observations:

Reinspection of hot water temperature conducted:

--The tankless water heaters have been examined and repaired. The system was discovered to have a clogged air filter. The filter system has been cleaned and a regularly scheduled maintenance service has been established to ensure it remains in functioning condition. The error messages on the water heaters have been cleared. Water of 124 *F was observed at the 3-compartment sink. The facility is hereby permitted to reopen. The closure sign was removed from the front door.

--No further rechecks are scheduled at this time. Ensure the hot water temperature is periodically checked to ensure the facility has water of at least 120 *F at all times. A copy of the food facility operator guide will be emailed to the owner and manager. Page 6 of this guide has a list of conditions under which the food facility must voluntarily close until those conditions are corrected.
